“Never a sacrifice of quality—a real team of professionals. I would rate Anderson Ashton a solid 10!”
— FLEXO-GRAPHICS, INC.
ALL THE EXPERTISE YOU NEED

At Anderson Ashton, we build confidence and trust into every commercial, industrial and institutional project. As a fully-integrated design/build general contractor, we see to every detail of your renovation, expansion or new construction so you can focus on the other tasks that matter to you and your organization.

All the expertise you need is available in one place from our LEED-accredited professionals, architects and engineers, to project and construction managers. Whether your priority is look, function, or performance and efficiency, Anderson Ashton’s experienced and easy to work with professionals are with you from start to finish.

HOW WE HELP

From manufacturing facilities to distribution centers, to schools and churches, our team offers yours a wealth of expertise in conventional or pre-engineered solutions. We bring creativity and craftsmanship from our door to yours.

We know you want a design/build partner you can trust—one who understands your needs and is there with you from concept to completion and beyond. You want to be confident that you’re being heard, that what’s promised is what’s delivered and that you won’t be disappointed. You want someone who proactively solves the inevitable problems that crop up during construction so you can remain focused on your business. We do these things and more from the first sketch to the final punch list.

WHO WE ARE

Since Wayne Anderson and Clay Ashton founded our firm in 1959, we've been one of southeastern Wisconsin's few, fully-integrated design/build general contractors. During our five decades, we've built more than 1500 customer relationships working with many of them multiple times. But we know that what we've done in the past isn't as important as what we can do for you now. We have the right talent in house and know the right folks outside—subcontractors, suppliers and building authorities—needed to get your project approved and finished, on time and on budget.

HOW WE WORK

At Anderson Ashton you'll find all the resources you need under one roof, giving you a single contract and, a single point of contact for your entire project. Our design/build approach provides for one-source responsibility and one-stop experience for a complete end-to-end project reducing time, cost and worry. We combine experience with the latest in design/build materials and technologies to create appealing and efficient spaces tailor made for your needs.

GREEN WITHOUT WASTING GREEN

We believe in building green without wasting green. While green building is important to our clients, we know what matters most is a functional, practical and economical space. Usually that's inherently a sustainable space. We excel in designing environmentally conscious, cost-effective, energy efficient buildings. Further, as an EnergySTAR Partner, we can help your organization earn your EnergySTAR rating.
WHAT OUR CLIENTS SAY

“Since 2002 we have entrusted Anderson-Ashton to provide design/build services on over $20 million worth of commercial retail renovation work on projects in Brookfield and South Milwaukee, WI. Their work is of the highest quality and met all of our objectives.”
—— CENTURY CAPITAL GROUP

“Most impressive to us was the ease with which you were able to resolve the unforeseen issues which would arise from time to time. The fact that we could trust your intentions as much as we trusted your judgment made for an efficient and comfortable environment in which we could conduct our business.”
—— MECHTRIX CORPORATION

“Projects were completed on time and always with the utmost quality. Additionally, the project managers were always very professional and very good at meeting our needs. Anderson Ashton was always accommodating, and helped us achieve our goals in a cost effective manner.
—— WISCONSIN OVEN CORPORATION

“It is a rare circumstance when pastors enjoy going to their church buildings during a construction project, since they are often fraught with headaches and stress. In no way has this been Pastor Paul’s experience, as he looks forward each day to witnessing the progress being made, and experiencing the creative atmosphere produced by the construction team. We are indeed blessed by your involvement in this project.”
—— ALL SAINTS LUTHERAN CHURCH, ELCA
